Tools tested (Available on prototype site)	Mar 2020	Milestone	All those working on software tools
User support: Blog (Forum) and Ticketing System on prototype site	Mar 2020	Milestone	See above

Climate Change

Points of discussion:

- Correction/removal of flagged data

- Keeping track of corrections of digitisation errors

- Yuri will draft a practical example of formatting and QC

- Should be consistent with the name of the arrival server

- Comments on first draft to be sent to Manola until mid-October

- Technology and server access for digitisation portal was sorted out, B-Open can now start development.

Climate
Change

- Not much feedback so far from users, generally positive

- A question came up on whether SEF should be used for processed data (e.g., homogenised). For this specific guidelines are needed (Yuri to produce a draft)

- C3S General Assembly: send to Stefan B. requests for topics to be discussed

- Next telecon on Tuesday 22 October 1400 UTC
