Change

WP3 SECTION ON DRS PORTAL

- Feedback on landing page for Tools and Community Support?
- Feedback on landing page for the Software Tools?
- Feedback on landing page for Best Practice Guidelines?
- Ticketing system: who has to contact whom to set it up?
Alessio will write to Paul
- Portal needs to be ready by 31st of January (a few things will still be missing: digitisation portal, BPG2, ...)

Change

USER GUIDES AND TECHNICAL DOCUMENTATION

- Ideally, the user guides of the different tools (dataresqc, stlocationqc, SEF and IMMA formatting) should have the same structure / format.
- We use GitHub wiki (easy to maintain, version-controlled). Already done for dataresqc (<https://github.com/c3s-data-rescue-service/dataresqc/wiki>).
B-Open working on an automatic conversion from wiki to PDF.
- Technical documentation: «A standard format will be chosen for the technical documents, and all partners will document the tools they provide»
R packages do not need much technical documentation. For Python software we could use Sphinx.

Change

DIGITIZATION PORTAL

- B-Open will show an example of the workflow on the portal for feedback in the coming weeks.

Climate
Change

BEST PRACTICE GUIDELINES 2

- Two of the three external reviews received, third review expected in the next few days
- Deadline for revised version by Manola: 2nd of March

Climate
Change

OTHER THINGS

- Next telecon 31 January 1500 UTC to review C3S DRS portal status
