C3S Data Rescue Lot 1

WP3 monthly telecon

Wednesday, 18 March 2020 15:00 UTC

Climate
Change

LOT 2 GENERAL ASSEMBLY

Relevant points discussed

- Adding Lot 2 inventory to Lot 1 registry
- Submitting Lot 1 rescued data asap for them to appear in the final release of GLAMOD (Feb 2021)
 - need conversion to SEF/IMMA (currently done by UniBe alone): priority is being given to Cape Town Observatory and Argentina DWR
- Future SEF stewardship: more involvement of Lot 2, possible support by WMO to be explored
- Still large uncertainty over next contract phase, Lot 2 will recommend merging with Lot 1

Change

STATUS OF PORTAL

- Portal was officially launched last month.
- Breno has been working on a SEF tutorial for Python that will be added soon
- Chesley uploaded the Python tools for IMMA to GitHub (will be linked in the portal)
- *dataresqc* has been added to CRAN
- GitHub documentation to be implemented into the portal (B-Open)
- Page on strip charts to be expanded (IEDRO)

LOT 1 ANNUAL PROGRESS MEETING

Thursday 26 March, 10:00-15:00 UTC

- Can B-Open already show something about the «digitization portal»?
 - See <http://digitizationportal.bopen.eu/>
- What remains to be done in WP3:
 - Convert data to SEF for GLAMOD
 - Digitize more data from S.H.
 - Digitization portal
 - Implement tools (?)
 - Annual State of Data Rescue Assessment
